

Dear Parents/Guardian/Students,

I pray you all are safe during this period. It is indeed a very challenging phase that we all are going through. However during this unprecedented time, we want to ensure that our students are able to study and cover up their syllabus.

As we couldn't begin the academic year as planned from month of April ' 20, due to the Government order of complete lockdown, we have missed almost 30 days of school, which we want to start off during this summer vacation period in the form of online classes. The subjects that will be covered under online classes are –Languages, Mathematics Science and Social Science.

We couldn't also begin the online class as we intended because the students did not receive their book as well as our teachers were at various places and couldn't even commute to take books, prepare and work on their class.

Now that there are few relaxations laid down on lockdown, we are coming together on an online platform to complete the syllabus of the students.

Every class will receive stipulated amount of assignments, solved exercises on a regular basis that must be completed and maintained in their respective subject copies. Parents can assist and ensure that your child completes the assignment. Detailed explanation of difficult topics along with supportive videos and resources will be continuously uploaded on the notice section of our website regularly.

In case of doubts and queries, parents and students can revert back to the concerned teacher through our Whatsapp No. 9679293719

We will have a term based assessment for which assignments given must be completed as per instruction in the respective subject copies with project works that must be submitted by parents in school. Notification regarding submission of copies and project work will be updated.

Together we hope and want to work out a way to enable our students to study and grow even during this crisis phase.

Seeking your kind co-operation in this regard.

Principal
